

IDS KIT D

IDS
Integrated Diagnostic System

NEW

Snap-on Equipment Solutions is pleased to announce the introduction of the IDS Kit D providing the dealer with a lower cost solution, which also meets the minimum dealer standard of an IDS Kit A. Now you have the choice – IDS Kit A or IDS Kit D.

Now you have the choice – IDS Kit A or IDS Kit D.

IDS Kit D

Kit D has been specifically designed to offer comparable diagnostic functionality to the IDS Kit A but at a fraction of the original Kit A price. It provides increased diagnostic and ETIS capacity for the workshop whilst offering outstanding value for money.

Kit D combines a high specification, semi-rugged, standard laptop, with a large, bright 15.4 inch LCD screen, a Vehicle Communication Module (VCM) and a Vehicle Measurement Module (VMM) as a fully supported package. Kit D is one of only four approved packages to be supported by the Ford IDS technical hotline and offers added peace of mind as it is backed by a comprehensive 2 year warranty scheme, similar to IDS Kit A, B and C.

£ 5,300.00*

*Includes 2 years warranty.
Excludes freight, local taxes
and duties where applicable.
